

July 13, 2012

The Honorable Michael Grimm
United States House of Representatives
512 Cannon House Office Building
Washington, DC 20515

Dear Representative Grimm:

The American Clinical Laboratory Association (ACLA) is pleased to offer our full and strong support for H.R. 6118, the *Taking Essential Steps for Testing Act* or TEST Act. This Bill would make a needed change to existing regulation benefitting the entire medical community. The TEST Act will update statutory language of the *Clinical Laboratory Improvement Amendments* (CLIA) to provide CMS much-needed discretion so that laboratories of all types, including hospital and independent laboratories, would not have their CLIA certificates revoked for the unintentional referral of proficiency testing samples. As a result of this important statutory change, laboratories will no longer be unfairly punished when a laboratory follows its usual practice and refers a specimen to another laboratory for either a test that it does not perform or for confirmatory testing. The TEST Act will prevent the wasteful time and expense that occurs when a laboratory's CLIA certificate is revoked, thus making it impossible for the laboratory to provide vital services to patients.

On behalf of our membership, ACLA thanks you again for demonstrating leadership in improving health care delivery by introducing legislation that helps existing government regulations to keep pace with advances in laboratory best practices.

Sincerely,

A handwritten signature in cursive script that reads 'Alan Mertz'.

Alan Mertz
President
