

Clinical Laboratory Fee Schedule

Below are test codes for which we received no (i.e., values of zero) and/or insufficient data to calculate a weighted median private payor rate.

CMS discussed these test codes at the annual clinical laboratory public meeting on July 31, 2017. CMS is seeking comments on:

1. Should the code be included on the clinical laboratory fee schedule?
2. If included, what method of payment should be used to price the test codes (crosswalking or gapfill, as stated in the Code of Federal Regulations, Section 414.507(g))?
3. If crosswalking, specify the crosswalk code(s).

August 18, 2017 is the end of the public comment period for these 60 codes. For all other posted codes (new and reconsidered), CMS will consider comments received through August 11 in making preliminary pricing method determinations for CY 2018 (to be posted in September, 2017).
